L.C. card 6—35347

This number identifies the Library of Congress printed card for the complete series of the *Catalog of Copyright Entries*.
For sale by the Superintendent of Documents,
U.S. Government Printing Office, Washington, D.C.
20402. Price of this part is given on page vi.

Preface

The CATALOG OF COPYRIGHT ENTRIES is published by authority of sections 210 and 211 of Title 17 of the *United States Code*. Section 210 provides in part: "The current catalog of copyright entries and the index volumes herein provided for shall be admitted in any court as prima facie evidence of the facts stated therein as regards any copyright registration."

The *Catalog* is subdivided into parts corresponding to the classes of material listed in section 5 of Title 17 of the *United States Code*. The table at the end of this preface shows the organization of the *Catalog*, the symbols used with the registration numbers to identify the classes, and the prices of the semiannual issues.

The record of each copyright registration listed in the *Catalog* includes a description of the work copyrighted and data relating to the copyright claim (the name of the copyright claimant as given in the application for registration, the copyright date, the copyright registration number, etc.).

Information as to changes of copyright ownership is not included in the *Catalog*, but a search of the Copyright Office Assignments and Related Documents Indexes may be requested from the Register of Copyrights. A fee for the search and report will be estimated at the statutory rate of \$5 per hour.

For each registration listed, except for renewals, there has been deposited a copy or copies of the work in accordance with the provisions contained in sections 12, 13, 14, or 215 of Title 17 of the *United States Code*.

For a more complete description of the contents of this issue of the *Catalog* see p. vii.

Orders, payable in advance, for all parts of the *Catalog of Copyright Entries* should be sent to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Orders may be placed for individual issues, as subscriptions for one or more parts, or for the complete *Catalog* at \$50 a year, and for periods of one, two, or three years. All orders should state clearly the title and the inclusive dates of the part wanted. Checks or money orders should be made payable to the Superintendent of Documents.

The Copyright Office welcomes inquiries, suggestions, and comments on the content and organization of the *Catalog*. Such communications should be addressed to the Chief of the Cataloging Division, Copyright Office, Library of Congress, Washington, D.C. 20540.

Organization of Parts

Each part listed in the following table records all current registrations in the class or classes indicated by the alphabetical symbols. Renewal registrations are listed separately at the end of each related part. Some parts also contain registrations made under symbols other than those listed for the particular part, if the subject matter or type of material is similar to that generally included in the part.

The first letter of the symbol is that of the class under which registration is made. Second and third letters, if any, that follow the initial letter are added by the Copyright Office for the purpose of statistical analysis. Their significance is as follows:

- F Published foreign works. In the case of books and periodicals, it designates works manufactured outside the United States (except those registered for ad interim copyright). In all other classes to which it applies, it designates works first published outside the United States, the authors of which are neither citizens nor domiciliaries of the United States. (AF, EF)
- I Books and periodicals registered for ad interim copyright. (AI, BI)

Introduction

PART 6 lists domestic and foreign maps, atlases, and other cartographic works registered in class F, together with similar works currently registered in other classes. Works for which the copyright has been renewed are listed separately in the Renewal Registrations section.

Arrangement is alphabetical under the name of the copyright claimant. Each work is described in a main entry which includes information pertinent to the copyright claim. References lead from the names of joint claimants, authors, and other contributors to the works, from the names of publishers, and from variant forms of names.

The Area List, arranged alphabetically by area, includes both currently registered works and renewal registrations, the latter being identified by the symbol R preceding the registration number. The Publishers Directory lists the publishers of current registrations together with the latest address for each as given in the application or the work.

Each main entry for works currently registered includes, in addition to the claimant's name under which it is filed, the following items of information if available and applicable:

- 1) Title, amplified if necessary by a brief identification of the area covered by the work, and followed by any variant titles.
- 2) Names of contributors to the work.

- 3) Edition statement.
- 4) Place of publication for all foreign works; for domestic atlases and plat books the place of publication if given in the imprint on the work, unless the work is entered under the name of the publisher as copyright claimant.
- 5) Name of the first-named publisher; when the publisher is also the claimant, the name is omitted.
- 6) Physical description using terms descriptive of the work, including number of pages or volumes if applicable.
- 7) Series statement.
- 8) Special descriptive data which includes scale, projection, and statements of insets and other supplementary maps.
- 9) Names of authors given in the application which do not appear elsewhere in the entry.
- 10) Name of the employer in the case of a work made for hire, if so named in the application.
- 11) Information contained in the application which relates to the registration of an earlier version of the work.
- 12) Brief statement of the new matter on which copyright is claimed, preceded by the abbreviation NM, if this information is given in the application and is not indicated elsewhere in the entry.

- 13) Copyright symbol ©.
- 14) A statement of limitation of claim if the application or notice on the work explicitly limits the claim.
- 15) Name of the copyright claimant.
- 16) Date of publication as given in the application.
- 17) Registration number.

Whenever it is necessary to indicate a variation between the information given in the application and in the copy of the work with respect to the claimant's name or the date of publication, the data from the application is given first, followed by the phrase "in notice" and the data given in the work; e.g., © Richard Roe & Co.; 8Jan68 (in notice: 1967) ; F46000.

For renewal registrations, the main entry includes, in addition to the claimant's name under which it is filed, the following items of information if available and applicable:

- 1) Title, including area.
- 2) Names of contributors to the work.
- 3) Edition statement.
- 4) Brief statement of the new matter on which the original copyright was claimed, preceded by the abbreviation NM, if available in the renewal application.
- 5) Copyright symbol ©.
- 6) Date of original copyright.
- 7) Original registration number.
- 8) Name of the renewal claimant followed by a statement in parentheses, usually abbreviated, giving the basis of the renewal claim as supplied by the applicant; e.g., "John Doe & Co. (PWH)" indicates that renewal of copyright is claimed by John Doe & Co. as proprietor of copyright in a work made for hire.
- 9) Date of receipt of the renewal application or fee, whichever is later.
- 10) Renewal registration number.

AREA LIST

A list of the current and renewal registrations in this issue arranged by area. It is designed to meet the needs of those who are searching for a map of a specific area. Renewal registrations are identified by the symbol R as the first element in the registration number.

The area headings consist of the names of the largest geographical or political units enclosed within the borders of the several maps. When the borders of a map do not coincide in any way with a single geographical or political unit, the name of the most significant unit contained therein is used in the heading. When a map contains three or more states comprising part of one of the geographical divisions of the United States, one of the headings which is given below in the list of "Geographical Divisions of the United States" is used. If the area shown on the map does not coincide with any of these divisions, one of the more generalized headings is used, e.g., United States, Northern. Names of rivers, lakes, and other geographical features are also included.

L.C. card 6—35347

This number identifies the Library of Congress printed card for the complete series of the *Catalog of Copyright Entries*.

For sale by the Superintendent of Documents,
U.S. Government Printing Office, Washington, D.C.
20402. Price of this part is given on page vi.

Preface

The CATALOG OF COPYRIGHT ENTRIES is published by authority of sections 210 and 211 of Title 17 of the *United States Code*. Section 210 provides in part: "The current catalog of copyright entries and the index volumes herein provided for shall be admitted in any court as prima facie evidence of the facts stated therein as regards any copyright registration."

The *Catalog* is subdivided into parts corresponding to the classes of material listed in section 5 of Title 17 of the *United States Code*. The table at the end of this preface shows the organization of the *Catalog*, the symbols used with the registration numbers to identify the classes, and the prices of the semiannual issues.

The record of each copyright registration listed in the *Catalog* includes a description of the work copyrighted and data relating to the copyright claim (the name of the copyright claimant as given in the application for registration, the copyright date, the copyright registration number, etc.).

Information as to changes of copyright ownership is not included in the *Catalog*, but a search of the Copyright Office Assignments and Related Documents Indexes may be requested from the Register of Copyrights. A fee for the search and report will be estimated at the statutory rate of \$5 per hour.

For each registration listed, except for renewals, there has been deposited a copy or copies of the work in accordance with the provisions contained in sections 12, 13, 14, or 215 of Title 17 of the *United States Code*.

For a more complete description of the contents of this issue of the *Catalog* see p. vii.

Orders, payable in advance, for all parts of the *Catalog of Copyright Entries* should be sent to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Orders may be placed for individual issues, as subscriptions for one or more parts, or for the complete *Catalog* at \$50 a year, and for periods of one, two, or three years. All orders should state clearly the title and the inclusive dates of the part wanted. Checks or money orders should be made payable to the Superintendent of Documents.

The Copyright Office welcomes inquiries, suggestions, and comments on the content and organization of the *Catalog*. Such communications should be addressed to the Chief of the Cataloging Division, Copyright Office, Library of Congress, Washington, D.C. 20540.

Organization of Parts

Each part listed in the following table records all current registrations in the class or classes indicated by the alphabetical symbols. Renewal registrations are listed separately at the end of each related part. Some parts also contain registrations made under symbols other than those listed for the particular part, if the subject matter or type of material is similar to that generally included in the part.

The first letter of the symbol is that of the class under which registration is made. Second and third letters, if any, that follow the initial letter are added by the Copyright Office for the purpose of statistical analysis. Their significance is as follows:

- F Published foreign works. In the case of books and periodicals, it designates works manufactured outside the United States (except those registered for ad interim copyright). In all other classes to which it applies, it designates works first published outside the United States, the authors of which are neither citizens nor domiciliaries of the United States. (AF, EF)
- I Books and periodicals registered for ad interim copyright. (AI, BI)

Introduction

PART 6 lists domestic and foreign maps, atlases, and other cartographic works registered in class F, together with similar works currently registered in other classes. Works for which the copyright has been renewed are listed separately in the Renewal Registrations section.

Arrangement is alphabetical under the name of the copyright claimant. Each work is described in a main entry which includes information pertinent to the copyright claim. References lead from the names of joint claimants, authors, and other contributors to the works, from the names of publishers, and from variant forms of names.

The Area List, arranged alphabetically by area, includes both currently registered works and renewal registrations, the latter being identified by the symbol R preceding the registration number. The Publishers Directory lists the publishers of current registrations together with the latest address for each as given in the application or the work.

Each main entry for works currently registered includes, in addition to the claimant's name under which it is filed, the following items of information if available and applicable:

- 1) Title, amplified if necessary by a brief identification of the area covered by the work, and followed by any variant titles.
- 2) Names of contributors to the work.
- 3) Edition statement.
- 4) Place of publication for all foreign works; for domestic atlases and plat books the place of publication if given in the imprint on the work, unless the work is entered under the name of the publisher as copyright claimant.
- 5) Name of the first-named publisher; when the publisher is also the claimant, the name is omitted.
- 6) Physical description using terms descriptive of the work, including number of pages or volumes if applicable.
- 7) Series statement.
- 8) Special descriptive data which includes scale, projection, and statements of insets and other supplementary maps.
- 9) Names of authors given in the application which do not appear elsewhere in the entry.
- 10) Name of the employer in the case of a work made for hire, if so named in the application.

- 11) Information contained in the application which relates to the registration of an earlier version of the work.
- 12) Brief statement of the new matter on which copyright is claimed, preceded by the abbreviation NM, if this information is given in the application and is not indicated elsewhere in the entry.
- 13) Copyright symbol ©.
- 14) A statement of limitation of claim if the application or notice on the work explicitly limits the claim.
- 15) Name of the copyright claimant.
- 16) Date of publication as given in the application.
- 17) Registration number.

Whenever it is necessary to indicate a variation between the information given in the application and in the copy of the work with respect to the claimant's name or the date of publication, the data from the application is given first, followed by the phrase "in notice" and the data given in the work; e.g., © Richard Roe & Co.; 8Aug68 (in notice: 1967); F47300.

For renewal registrations, the main entry includes, in addition to the claimant's name under which it is filed, the following items of information if available and applicable:

- 1) Title, including area.
- 2) Names of contributors to the work.
- 3) Edition statement.
- 4) Brief statement of the new matter on which the original copyright was claimed, preceded by the abbreviation NM, if available in the renewal application.
- 5) Copyright symbol ©.
- 6) Date of original copyright.
- 7) Original registration number.
- 8) Name of the renewal claimant followed by a statement in parentheses, usually abbreviated, giving the basis of the renewal claim as supplied by the applicant; e.g., "John Doe & Co. (PWH)" indicates that renewal of copyright is claimed by John Doe & Co. as proprietor of copyright in a work made for hire.
- 9) Date of receipt of the renewal application or fee, whichever is later.
- 10) Renewal registration number.

AREA LIST

A list of the current and renewal registrations in this issue arranged by area. It is designed to meet the needs of those who are searching for a map of a specific area. Renewal registrations are identified by the symbol R as the first element in the registration number.

The area headings consist of the names of the largest geographical or political units enclosed within the borders of the several maps. When the borders of a map do not coincide in any way with a single geographical or political unit, the name of the most significant unit contained therein is used in the heading. When a map contains three or more states comprising part of one of the geographical divisions of the United States, one of the headings which is given below in the list of "Geographical Divisions of the United States" is used. If the area shown on the map does not coincide with any of these divisions, one of the more generalized headings is used, e.g., United States, Northern. Names of rivers, lakes, and other geographical features are also included.
